Sentry portable Filtration trolley

At the entry level of our range is the sentry filtration system.

Perfect for light duty applications, replenishing systems with clean oil, emptying waste oil quickly, off-line contamination control and end of production line flushing, our portable filtration system is ideal for both transfer and filtration of your fuel or oil.

Features:

- Up to 25l/min flow rate
- Uses standard 110 or 240VAC mains electric
- Off-line contamination control
- Cleanliness level down to ISO cleanliness code

14/12/9-13/11/8

Benefits:

- Low cost
- Small footprint
- Easy to transport
- Low cost replacement cartridges
- A range of element micron ratings available
- Easy element changeover
- Perfect for replenishing systems with filtered oil, end of production line flushing and emptying waste oil quickly
